

Mathematics 1

MELC: Identifying Place Value and Value in 1 – 2- Digit Numbers

Lesson 5: Tens and Ones

What I need to know

Good day kids! Today, you will identify the place value of 2 – 4 digit numbers. You will also learn to give the value of each digit in 2 to 4 digits.

I have 15 popsicles stick. I will tie 10 stick together. Look!

How many

This is 10 ones or 1 tens.
are there? _____

How many

are there? _____

15 is 1 tens and 5 ones.

What I know

How many

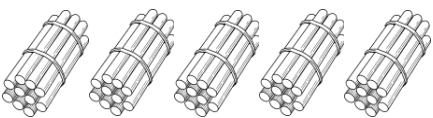

are there? _____

How many

are there? _____

How many  are there? _____

How many  are there? _____

How many  are there? _____

What's In

Write the numeral for each word.

1. twenty-nine = _____
2. Nineteen = _____
3. Forty-seven = _____
4. Twenty-one = _____
5. fifty = _____

What's new

Right now, we are going to learn new word. That word is DIGIT

Can we say it together? DIGIT

So, what is digit?

Digits are the parts of a number. Look at the number 920

32 -there are 3 parts or digit in this number.

-has 2 digits

Let us look at the number 34

34 -there are 2 parts or digit

-has 2 digits

Finally, let's look at the number 6

6 -has only one digit

Here is where Place Values come in!

The place value is how much a digit is worth based on where it is. In other words. Where a digit is in the number tells us how much it is worth.

- ❖ What are the place value we are looking for today?
- ❖ What are the different values of the places where the digits will be or the digits will be either in **ones** spot, or the **tens** spot

Let us use the Place Value

| TENS | ONES |
|------|------|
| 3 | 8 |

The place value can go higher than this. But these are the only place values we're gonna learning about today!

Remember: look at the place the digit is in before you decide to value the number.

The number on the left tells the number of tens, the number on the right tells the number of ones.

So, our first example is the number 43

I'm gonna need your help.

3 8 digit
└──┬──┘
└──┘ digit

- ❖ Which is in the **ones** spot?
- ❖ Which is in **tens** spot?

Ones: 8

Tens: 3

Our next example is the number 57

I'm gonna need your help again.

4 7

- ❖ Which digit is the **ones** spot?
- ❖ Which digit is the **tens** spot?

Ones: 7

Tens: 4

Now you're gonna give it a try without any help and you can learn so much.

With the help of your guardian. Encircle the Place Value of the underlined digit. Number 1 38 is done for you.

1. 38 ones tens

2. 17 ones tens

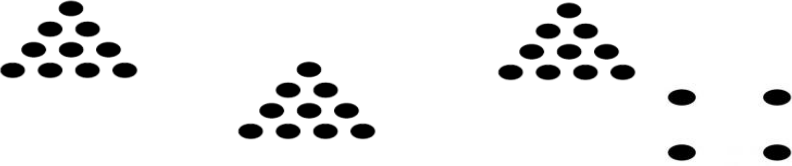

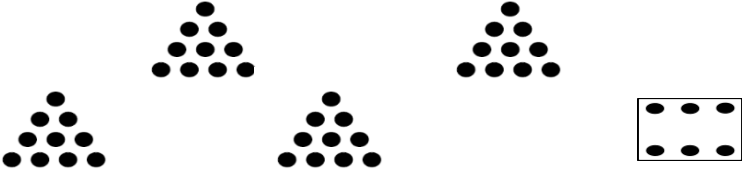

3. 39 ones tens

4. 48 ones tens

5. 26 ones tens

What's more

A. With the help of your guardian. Count the number of tens and ones in each set. Write the numeral.

| Given | Tens | Ones | Numerals |
|---|------|------|----------|
|  | | | |
|  | | | |
|  | | | |
|  | | | |

A. With the help of your guardian. Write the digits in the place value chart.

| Numerals | Tens | Ones |
|----------|------|------|
| 23 | | |
| 49 | | |
| 46 | | |
| 17 | | |

B. With the help of your guardian. Copy the place value of the following numbers. Number 1 is done for you.

1. 14 = 1 tens 4 ones
2. 35 = tens ones
3. 22 = tens ones
4. 29 = tens ones
5. 10 = tens ones

C. With the help of your guardian. Write the number of tens and ones. Number 1 is done for you.

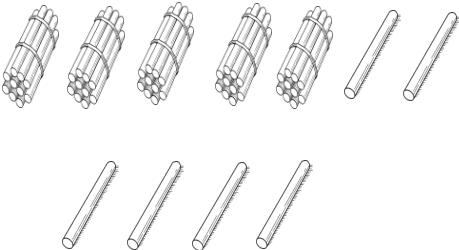

1. 18 = 1 tens, 8 ones
2. 29 = 2 tens, ones
3. 40 = 7 tens, ones
4. 12 = tens, 2 ones
5. 36 = tens one

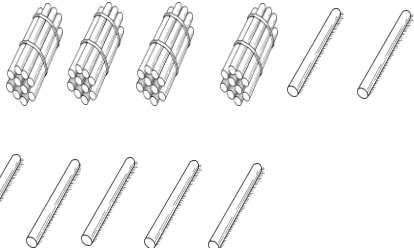

D. With the help of your guardian. Write the number of tens and ones

1.  _____ tens, _____ ones

2.  _____ tens, _____ ones

3.  _____ tens, _____ ones

4.  _____ tens, _____ ones

6.  _____ tens, _____ ones

What I have learned

We have learned that the number
on the left tells the number on the right tells
tells the number of ones.

Assessment

With the help of your guardian. Circle the numeral at the right that matches the digits in the place value chart.

| Tens | Ones | | |
|------|------|----|----|
| 2 | 4 | 42 | 24 |
| 1 | 3 | 13 | 31 |
| 2 | 3 | 23 | 32 |
| 1 | 2 | 21 | 12 |
| 1 | 4 | 14 | 41 |
| 3 | 2 | 23 | 32 |
| 1 | 2 | 21 | 12 |
| 3 | 4 | 34 | 43 |
| 4 | 6 | 46 | 24 |
| 4 | 7 | 47 | 27 |
